## Miniature Ascent Rate Alarm

MARA® is designed to monitor ascent rates to help prevent decompression sickness, better known as the bends.

**FITS ON ANY MASK STRAP!**

### MARA® FEATURES:

- Audible ascent rate
- Safety decompression stop
- Alarm heard only by diver
- Easily heard through a hood
- Superior precision electronics
- Industrial grade
- Lasts 5 years or 1,000 dive hours
- A MUST-HAVE FOR ALL DIVERS!

**MINIATURE  
ASCENT RATE ALARM**

# The NEWEST Diving Safety Accessory On The Market!

## What is MARA®?

**MARA®** stands for **Miniature Ascent Rate Alarm**. This bright yellow diving safety accessory is only the size of a match box, and is designed to make diving safer by monitoring the ascent rate to help prevent decompression sickness. Ascent rate problems are the second biggest cause of decompression sickness or DCS.

## Why use MARA®?

Many divers can't hear or see their dive computer, or don't pay attention to their ascent rate. **MARA®** easily fits on any mask strip, and is audible to the diver even wearing a diving hood. It makes for a great addition to a dive computer, and can be used alone.

## Who should it?

**MARA®** is ideal for both new and seasoned divers! Here are some of the many reasons why:

- Great for new divers still learning to control their buoyancy
- Underwater photographers who have their hands full and can't read their computer
- Anyone who can't afford a dive computer with an audible alarm
- Rescue personnel normally diving in water with low visibility or have no visual reference of ascent rate
- Excellent for night diving!
- **A MUST-HAVE FOR ALL DIVERS!** It should be worn routinely, just like wearing a diving knife or any other standard piece of diving kit!

Tim Stevens, President  
Master Underwater Technologies Inc.

## How does it work?

Containing superior electronics and a high end industrial pressure sensor, **MARA®** detects changes in water pressure and analyzes it against time and electronic dive tables. If **MARA®** detects the diver ascending at a rate faster than 30 feet or 10 meters/ min, it sends an alarm warning to slow down. It even provides a Safety Stop at 15 feet or 5 meters.

## Is it easy to use?

**Yes!** Simply put **MARA®** on the mask strap and then forget about it! It fits comfortably and only the diver hears it. It can easily be heard with or without a hood.

## How long does it last?

**Designed to last 5 years or 1,000 dive hours**, whichever comes first. Battery operated, **MARA®** is only activated when under water. The battery is non-replaceable, and customers may return their **MARA®** to the manufacturer for recycling.

## Is there a warranty?

There is a 1 year warranty with proof of purchase. Should a problem occur, simply contact Master Underwater Technologies Inc. by email, phone or fax.

## What people are saying!

*"After being alerted by the **MARA®** alarm beeps through my hood, confirmed that my ascent was too rapid on my computer and took action accordingly. You have a new fan!"*

– Dave Green,  
Diver, UK

*"Pitch and volume perfect"  
"Safety Stop right on target!"*

– Anne Colier,  
10 Years Diving

*"I have been using the **MARA®** system while teaching and diving recreationally for the past 6 months. While it cannot replace my dive computer, the **MARA®** system provides an audible ascent alarm that I have come to rely upon whether doing multiple ascent with students or coming up after an extended pleasure dive. My dive computer only warns me when I exceed the optimal ascent rate of 30 feet per minute, and the alarm is barely audible. As an instructor, I appreciate the safety and simplicity of being able to maintain ascent rate standards without having to take my eyes off my student. My **MARA®** tells me exactly how fast I am ascending whether 30, 40, 50 or 60 feet per minute, all while I am in full control of my student"*

– Les B. Newman, C.G.A.,  
PADI-Master Instructor

*"Unobtrusive and accurate"  
"Tunes are easily heard through a hood"*

– Parris Champoise,  
Master Diver

**Technically Advanced! Now Available Throughout the USA, Canada & the UK!**
